

PHYSICS 151 READING
ASSIGNMENT FOR SEPTEMBER 24
SECTION 4.8

4.8 - Newton's Third Law

- The third law can be quite tricky, the most important thing to remember is that action and reaction act on different objects, they do *NOT* cancel each other out.
- The section on propulsion is useful in learning how we get around every day.
- Pay special attention to the Integrated Example 4.11. It shows how we use the third law when drawing free-body diagrams.
