Energy at the Bottom of the Swing

At the lowest point of the pendulum’s swing:

a.) $\text{PE} = mgr$, $\text{KE} = 0$

b.) $\text{PE} = \left(\frac{1}{2}\right)mv^2$, $\text{KE} = 0$

c.) $\text{PE} = \text{KE} = 0$

d.) $\text{PE} = \left(\frac{1}{2}\right)mv^2$, $\text{KE} = mgr$

e.) $\text{PE} = 0$, $\text{KE} = \left(\frac{1}{2}\right)mv^2$
