Notes:

Required Classes: One of the physics courses 301, 303, 405 and 491, plus four additional 3cr upper level courses in physics or astrophysics, one of which must be in astrophysics and one of which must be a lab (not including ASTR 455, PHYC 451, and 452).

This roadmap assumes 303 and 405, and that the additional courses do not have problems hours, which may not be the case

The Departmental Honors Program requires 2 semesters of an Honors Section of Physics 456. The student and faculty mentor present a mutually-agreeable topic to the department for approval. Also, the University requires a GPA of at least a GPA of at least 3.25. See the Honors web page for more information at <http://panda.unm.edu/AcadAdv/honors.html>

*Physics 167, 168, 267, 331, 311, 313, 311, 415, 416, 496, and 497 are all One Credit Hour Recitation Sections associated with Physics 160, 161, 262, and 330, 301, 303, 304, 405, 406, 491, and 492, respectively. These recitation sessions are practice in solving problems from the associated lecture courses. They are very useful and strongly recommended for the major.

**Recommended and will complete Mathematics or Statistics Minor, it not taken another minor (or 2nd Major) must be completed.

Math 313 and Physics 466 are especially recommended as electives useful for Physics Majors.
