## June 24, Week 4

Today: Chapter 5, Applying Newton's Laws

Homework \#4 is now available.

## Equilibrium versus Dynamics

At equilibrium, the individual forces acting on an object add to zero.

## Equilibrium versus Dynamics

At equilibrium, the individual forces acting on an object add to zero.

$$
\sum F_{x}=0, \quad \sum F_{y}=0
$$

## Equilibrium versus Dynamics

At equilibrium, the individual forces acting on an object add to zero.

$$
\sum F_{x}=0, \quad \sum F_{y}=0
$$

When an object accelerates, the forces do not add to zero and Newton's Second Law becomes

$$
\sum F_{x}=m a_{x}, \quad \sum F_{y}=m a_{y}
$$

## Equilibrium versus Dynamics

At equilibrium, the individual forces acting on an object add to zero.

$$
\sum F_{x}=0, \quad \sum F_{y}=0
$$

When an object accelerates, the forces do not add to zero and Newton's Second Law becomes

$$
\sum F_{x}=m a_{x}, \quad \sum F_{y}=m a_{y}
$$

But there are not necessarily any NEW forces acting on the object!

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise I

A minivan is traveling with a constant speed of $30 \mathrm{~m} / \mathrm{s}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise II

A minivan is traveling with speed of $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. Which of the following is the correct free-body diagram for the minivan?

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?
(a) 700 N

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?

$$
\begin{array}{ll}
\text { (a) } 700 N & \text { (b) } 300 N
\end{array}
$$

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?

$$
\begin{array}{lll}
\text { (a) } 700 N & \text { (b) } 300 N & \text { (c) } 1000 N
\end{array}
$$

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?

$$
\begin{array}{lll}
\text { (a) } 700 N & \text { (b) } 300 N & \text { (c) } 1000 N
\end{array}
$$

(d) 400 N

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?

$$
\begin{array}{lll}
\text { (a) } 700 N & \text { (b) } 300 N & \text { (c) } 1000 N
\end{array}
$$

(d) $400 \mathrm{~N} \quad$ (e) 20700 N

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?
(a) 700 N
(b) 300 N
(c) 1000 N
(d) $400 \mathrm{~N} \quad$ (e) 20700 N

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?
(c) 1000 N

## Dynamics Exercise III

A $700-\mathrm{kg}$ minivan is traveling at $30 \mathrm{~m} / \mathrm{s}$ and accelerating at $1 \mathrm{~m} / \mathrm{s}^{2}$. If there is a $300-N$ drag acting against the car, what force is the road exerting on the minivan?

$$
\begin{aligned}
& \sum_{x} F_{x}=m a_{x} \Rightarrow \\
& f_{\text {road }, x}+n_{x}+D_{x}+w_{x}=m a_{x} \Rightarrow(\mathrm{c}) 1000 \mathrm{~N} \\
& f_{\text {road }}-D=m a_{x} \\
& f_{\text {road }}-300 \mathrm{~N}=(700 \mathrm{~kg})\left(1 \mathrm{~m} / \mathrm{s}^{2}\right)
\end{aligned}
$$

## Apparent Weight

Scales do not measure weight, they measure normal force.

## Apparent Weight

Scales do not measure weight, they measure normal force.

Example: An 80 kg man steps on a bathroom scale. In his bathroom, what does the scale read?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

## Apparent-Weight Exercise I

A man steps on a bathroom scale which is in an elevator that is accelerating upwards. Which of the following is the correct free-body diagram for the MAN?

The normal force, $\overrightarrow{\mathrm{n}}$ IS, the upward push from the floor. In order for the man to accelerate upwards, it must get larger than his weight. No new forces are in this problem.

## Apparent-Weight Exercise II

An 80-kg man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?

## Apparent-Weight Exercise II

An 80-kg man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?
(a) $0 N$

## Apparent-Weight Exercise II

An 80-kg man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?
(a) 0 N
(b) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}-2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=584 \mathrm{~N}$

## Apparent-Weight Exercise II

An 80-kg man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?
(a) $0 N$
(b) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}-2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=584 \mathrm{~N}$
(c) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}\right)=784 \mathrm{~N}$

## Apparent-Weight Exercise II

An $80-\mathrm{kg}$ man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?
(a) $0 N$
(b) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}-2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=584 \mathrm{~N}$
(C) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}\right)=784 \mathrm{~N}$
(d) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}+2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=984 \mathrm{~N}$

## Apparent-Weight Exercise II

An $80-\mathrm{kg}$ man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?
(a) $0 N$
(b) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}-2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=584 \mathrm{~N}$
(c) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}\right)=784 \mathrm{~N}$
(d) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}+2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=984 \mathrm{~N}$
(e) Not enough information to determine

## Apparent-Weight Exercise II

An 80-kg man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?
(a) $0 N$
(b) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}-2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=584 \mathrm{~N}$
(c) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}\right)=784 \mathrm{~N}$
(d) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}+2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=984 \mathrm{~N}$
(e) Not enough information to determine

## Apparent-Weight Exercise II

An $80-\mathrm{kg}$ man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?

$$
\begin{aligned}
& \sum F_{y}=M a_{y} \Rightarrow \\
& n_{y}+w_{y}=m a_{y} \Rightarrow \\
& n-w=m a_{y} \\
& n-m g=m a_{y} \Rightarrow n=m\left(g+a_{y}\right)
\end{aligned}
$$

(d) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}+2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=984 \mathrm{~N}$

## Apparent-Weight Exercise II

An $80-\mathrm{kg}$ man steps on a bathroom scale which is in an elevator that is accelerating upwards at $2.5 \mathrm{~m} / \mathrm{s}^{2}$. What does the scale read?

$$
\begin{aligned}
& \sum F_{y}=M a_{y} \Rightarrow \\
& n_{y}+w_{y}=m a_{y} \Rightarrow \\
& n-w=m a_{y} \\
& n-m g=m a_{y} \Rightarrow n=m\left(g+a_{y}\right)
\end{aligned}
$$

(d) $(80 \mathrm{~kg})\left(9.8 \mathrm{~m} / \mathrm{s}^{2}+2.5 \mathrm{~m} / \mathrm{s}^{2}\right)=984 \mathrm{~N}$

Scale's reading $=n=$ apparent weight
